-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 February 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1, 2, 4-11, 13, 15, and 16 in the reply filed on 2/10/2009 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 9, and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Morgan et al. 6666877.
4. Morgan et al. teaches an apparatus comprising: an elongate tensile member (44); a helical anchor (36) coupled to the elongate tensile member and having an interior space (see figs.); a bone anchor (16) coupled with the elongate tensile member and positioned outside of the interior space; and wherein the helical anchor is compressible (fig. 4).
5. Claim 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayhurst 4741330.

Art Unit: 3734

6. Hayhurst teaches a method comprising: inserting an elongate tensile member (82) with the tendon or ligament; inserting a soft tissue anchor (68) within a tendon or ligament (74 goes within the tendon or ligament); attaching a bone anchor (80) to a bone; coupling the elongate tensile member to the soft tissue anchor (fig. 17); coupling the elongate tensile member to the bone anchor (fig. 17); and applying tension to the elongate tensile member to approximate the tendon or ligament and the bone (fig. 17)

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2, 4, 5, 7, 15 rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al. in view of Hayhurst.

9. Morgan et al. teaches the apparatus of claim 1. It should be noted that Morgan et al. fails to teach a retaining member.

10. Hayhurst teaches an apparatus comprising a retaining member for immobilizing tissue (col. 8, lines 11-14). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Morgan et al. in view of Hayhurst to keep a tendon or ligament from moving.

11. Morgan/Hayhurst teach a slidable locking member (71 or 73); and wherein the sliding locking member is formed integrally with the retaining member (figs. 10-11).

Allowable Subject Matter

12. Claims 6, 8, 11, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL G. MENDOZA whose telephone number is (571)272-4698. The examiner can normally be reached on Mon.-Fri. 9:00 a.m. - 5:00 p.m..
